

Art.720D125 Discontinuous EFP Profile*Technical features and benefits*

- PFL profile for fixing photovoltaic panels on roofs
- For discontinuous applications
- Material: steel with anti-corrosion treatment
- In case of ribs, it must be installed between one rib and the other (lower part)
- make sure that the rib is lower than the profile
- For applications with panels arranged horizontally
- Profile guide 41, therefore compatible with all CorSTRUT components
- For applications flush with the roof
