

Art. 975X Fixed point on cantilever arm - AISI 304

Technical specifications and advantages

- Ideal solution for pipes subject to significant thermal contractions and/or expansions
- For bracketing with fixed point on cantilever arm
- Suitable for all types of fixed point, both with horizontal and vertical pipe
- Possibility of adjusting the distance
- AISI 304 stainless steel, AISI 316 on request
- Components for standard fixed point: 2 cantilever arms, 4 special 90° angle brackets, 2 heavy clamps
- It is possible to insert bracing to increase the axial resistance
- The clamps are not included in the package

Code	A [mm]	Payload [N]
975X300	300	2300
975X450	450	2300
975X600	600	2300

SPECIFICATION ITEM

Supply and installation of bracketing with fixed point for pipes subject to thermal expansion on stainless steel cantilever arm with distance adjustment for both horizontal and vertical pipes, with all the relative fastening components
